ANL-012 · Analytics dashboards

Donor receipts

Excel summary plus a CSV for Power BI Desktop.

Receipts by fund for a small nonprofit. Not a set of financial statements.

1. Open summary.xlsx and confirm the total matches the data sheet.
2. Load facts.csv into Power BI Desktop as a table named Facts.
3. Paste measures.dax into new measures.
4. Replace the sample rows before you use the numbers in a report.

The workbook and CSV are sample data for learning the model. A PBIX file is not included. Paste the DAX into Power BI Desktop after you load the CSV. This is not a financial audit.
