How to finish the Software engineer CV kit

A one-page structure for an engineer who ships features, with sample bullets you replace.

Replace the sample

1. Put your name and city in the heading. A full street address is unnecessary.
2. Replace each role with yours. Keep the shape: action and result.
3. Delete a skill you cannot discuss for five minutes.
4. Link a repository or a description of a system you can talk about.
5. Do not list a tool you have not used in the last two years.

Before you send

- The file name is YourName-Role.pdf.
- A person who does not know you can see the target role in the first three lines.
- You can defend every number in an interview.

The employment history in this file is fictional sample text. Replace every line before you send it. This kit does not guarantee interviews.
