Founder LinkedIn banner

SVG files you can upload. Not a native Canva template.

A 1584 by 396 banner for a fictional founder, Sam Patel, who builds booking tools for independent clinics. The line is specific enough to replace with your own offer.

Files and sizes

File	Pixels
linkedin-banner.svg	1584 x 396

How to edit

1. Replace the product and the city.
2. Check the banner at LinkedIn's display size after upload.
3. Do not put a paragraph on this size.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
