Saturday kitchen menu

SVG files you can upload. Not a native Canva template.

A portrait menu for Harbour Smoke, a fictional Saturday kitchen. Four dishes, one drink, and a note about the last order. Prices are sample rand amounts.

Files and sizes

File	Pixels
saturday-menu.svg	1080 x 1520

How to edit

1. Change dish names and prices each week.
2. Keep the last-order line. Customers miss it when it is only spoken.
3. Print from the SVG or export a PDF in your editor.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
