Interview podcast cover

SVG files you can upload. Not a native Canva template.

Cover art for a fictional show, Desk Notes, episode 18 with guest Ayesha Khan on hiring a first contractor. The layout leaves a clear area for the guest name.

Files and sizes

File	Pixels
podcast-cover.svg	1400 x 1400

How to edit

1. Keep the show name in the same place every episode.
2. Replace the guest and the episode number.
3. Export a 3000 pixel PNG if your host asks for a larger file.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
