Workshop certificate

SVG files you can upload. Not a native Canva template.

A certificate for a fictional workshop, Writing a one-page brief, run by MOHAO's sample instructor line. The participant name is set as 'Participant name' so you can replace that one line.

Files and sizes

File	Pixels
certificate.svg	1600 x 1100

How to edit

1. Replace the participant name for each person, or overlay it in your editor.
2. Change the date and the city.
3. This certificate does not verify attendance. Say that if someone asks.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
