YouTube thumbnail pair

SVG files you can upload. Not a native Canva template.

Two 1280 by 720 thumbnails for a fictional channel, Sheet Club, about spreadsheets for operators. One promises a cash-flow layout. The other names a common mistake. No faces are included, so you are not stuck with a stock person.

Files and sizes

File	Pixels
thumbnail-howto.svg	1280 x 720
thumbnail-mistake.svg	1280 x 720

How to edit

1. Keep the title under four short lines.
2. Use the orange bar for the video that is a warning, and the light background for the how-to.
3. Test the type at 320 pixels wide.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
