Product launch announcement

SVG files you can upload. Not a native Canva template.

Launch art for a fictional notebook, Field Notes for Foremen, releasing 3 November. The design is the announcement, not a mockup of the notebook.

Files and sizes

File	Pixels
launch-square.svg	1080 x 1080

How to edit

1. Change the product name and the date.
2. If the date slips, change the file. Do not post the old SVG.
3. Pair it with a photograph of the real product when you have one.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
