Client quote cards

SVG files you can upload. Not a native Canva template.

Two testimonial layouts for a fictional bookkeeper, Miles & Co. The quotes are written as samples. Replace them with words a real client has approved in writing.

Files and sizes

File	Pixels
quote-invoice.svg	1080 x 1080
quote-month.svg	1080 x 1080

How to edit

1. Do not publish a quote you do not have permission to use.
2. Keep the quote under 30 words.
3. Name the person the way they asked to be named.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
