Sale badge set

SVG files you can upload. Not a native Canva template.

Three small badges a clothing shop can place on a product image. The sample shop is Loom Room. Each badge states a different rule so they are not three versions of the same sticker.

Files and sizes

File	Pixels
badge-percent.svg	800 x 800
badge-last.svg	800 x 800
badge-members.svg	800 x 800

How to edit

1. Use the badge that matches the actual rule.
2. Remove the badge when the sale ends.
3. Do not stack all three on one product.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
