# Email header bar

SVG files you can upload. Not a native Canva template.

A 1200 by 400 header for Issue 12 of a fictional letter, Monday Dispatch, about raising prices. It is an image, not an email template.

## Files and sizes

| File | Pixels |
|---|---|
| email-header.svg | 1200 x 400 |

## How to edit

1. Change the issue number and the topic.
2. Keep the image under a few hundred kilobytes when you export PNG.
3. Do not put the unsubscribe link inside the image.

## Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

*Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.*
