Class schedule story

SVG files you can upload. Not a native Canva template.

A schedule for a fictional strength gym, Yard Strength. Three sessions, with the level written next to the time. It is for one week, so the dates are part of the design.

Files and sizes

File	Pixels
class-schedule.svg	1080 x 1920

How to edit

1. Replace the week dates every Sunday.
2. Mark the level so a beginner does not book the heavy session.
3. Remove a class that is full rather than writing 'maybe'.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
