DSN-017 · Design templates

Wedding invitation suite

SVG files you can upload. Not a native Canva template.

MOHAO digital product

Two cards for a fictional wedding, Leila and James, on 4 April 2027 in Stellenbosch. The RSVP card has its own date so guests are not guessing.

Files and sizes

File	Pixels
invitation.svg	1080 x 1520
rsvp.svg	1080 x 1080

How to edit

1. Replace the names, place, and both dates.
2. Keep the RSVP date earlier than the wedding.
3. Print with a bleed added in your editor. The SVG is the design area.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
