Job-open story

SVG files you can upload. Not a native Canva template.

A story for a fictional studio hiring a junior designer in Durban. Applications close on a date. There is no 'competitive salary' line, because that says nothing.

Files and sizes

File	Pixels
job-story.svg	1080 x 1920

How to edit

1. Name the role, the city, and the close date.
2. Put the apply path in the caption.
3. Take the story down when the date passes.

Canva, Figma, and print

Create a design at the pixel size in the table, then upload the SVG. In Canva this is an upload, not a brand template from Canva's library. In Figma, place the SVG and edit the text layers. For print, add bleed in the editor. The SVG is the design area.

Sample names and offers in these designs are fictional. Replace them before you publish. This package is not a native Canva file.
