Time blocking for operators

Put the week's real work on a calendar before the week fills with chat.

MOHAO digital product

Three kinds of time

Delivery, sales, and admin. If you do not block them, delivery eats the week and invoices go out late. Block them before you accept another meeting.

- One delivery block.
- One sales block.
- One admin block.

How long

Start with ninety minutes. A four-hour fantasy block will be broken and then you will say the method failed. Protect the ninety minutes as a meeting with yourself.

- Ninety minutes.
- A name on the block.
- Notifications off.

Meetings

Cluster meetings on two days if you can. A thirty-minute meeting in the middle of a delivery block costs the whole block. Say so when you decline.

- Cluster them.
- Decline one this week.
- Give a reason.

Friday look

On Friday, look at the blocks you missed. Do not scold yourself. Move the work or drop it. A block you miss every week is a lie. Delete it.

- Which block was a lie.
- Move or delete.
- One change for next week.
