Subscription audit

Replace the sample figures before you rely on the result.

The sample keeps music at R69 and cloud storage at R40. It marks video, gym, and news for cancellation. Those three cost R438 a month, or R5,256 a year, but only after the cancellation is confirmed.

How to use the workbook

1. Export a month of bank transactions and add every repeating charge.
2. Use Keep or Cancel exactly.
3. Cancel with the provider, then change the monthly amount to zero only when a later statement proves it stopped.
4. The annual saving stays on the sheet until then so you do not count it early.

Worked example

Keep is R109 a month.

- Cancel is R438 a month.
- The gym alone is R2,988 a year in the sample.

A practical routine

- Do this twice a year.
- Shared family plans need one owner. Write that name in the note.
- Free trials belong on the list on the day they start.

This workbook organises figures you type in. It is not financial, credit, insurance, or tax advice. Rates, fees, and laws change. A qualified adviser should review decisions that affect debt, tax, medical cover, or retirement.
